

The factory is located in the beautiful city of Zhuji, enjoying a convenient transportation.

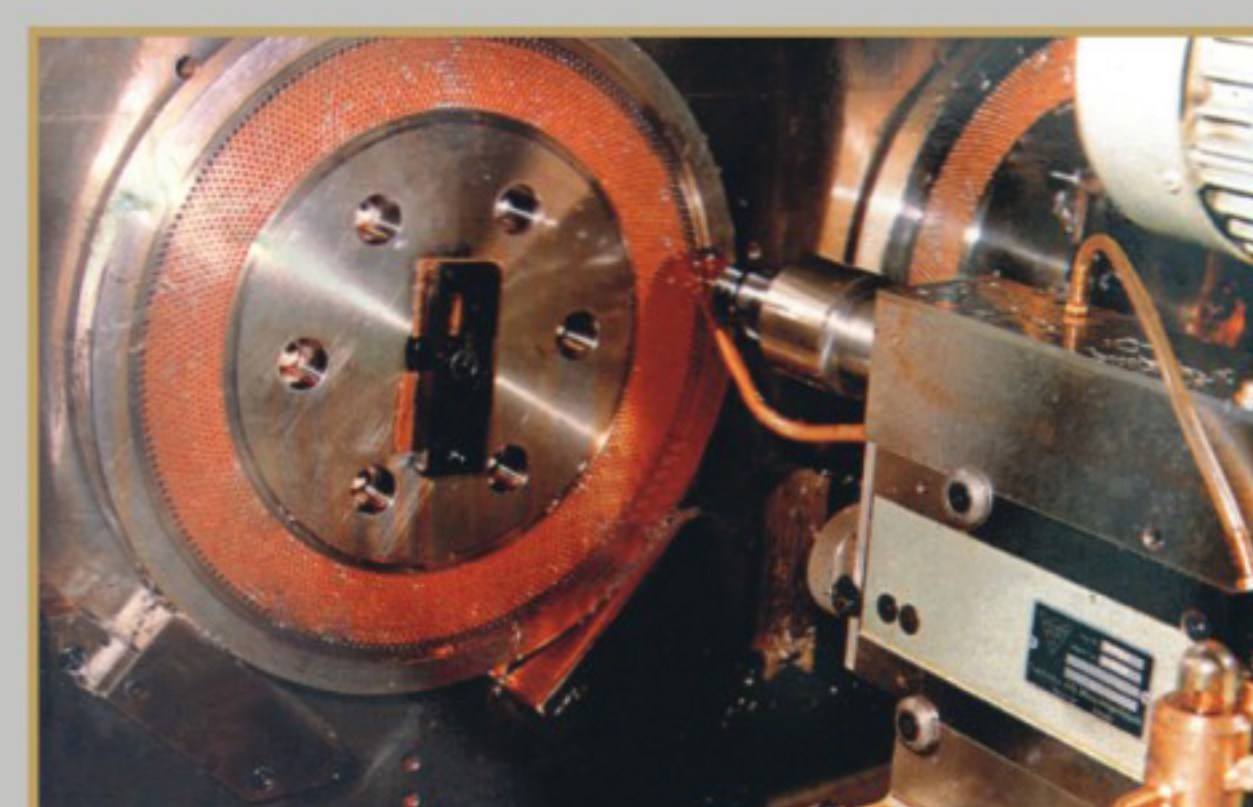

Established in 1990, the company professionally manufactures all kinds of spray nozzle、chemical fiber spinning jet and processes micro pore (Minimum Diameter reaches $\phi 0.03\text{mm}$) . The product of the company applied the approval of national patent in 1994. In 1995, it was awarded the national-level new product. In the same year, the enterprise passed ISO9001 National Quality System Authentication. With mature and stable performance, the product wins satisfaction from business circles, and gets unanimous good opinions from many businessmen.

Since its foundation, the factory always insists on the management idea of “regard sincerity and prestige as origin, win the victory with quality and service”, keeping improving and processing finely. Factory director MrYao and their staffs wish to cooperate with both new and old customers, and create a brilliant tomorrow together.

专用磨针机
Special needle grinding machine

喷丝板加工
Spinneret machining

伺服喷丝头冲孔机
Servo nozzle head punch press

采用伺服系统控制定位精度0.005mm、重复定位精度0.002mm，配置断针报警装置，断电处理程序。

We adopt servo system control positioning accuracy 0.005mm repeated positioning accuracy 0.002mm, matching with broken needle alarm device, power interruption disposal program.

自动化打标机
Automatic marking machine

适用于各种金属产品上打印数字、操作系统灵敏。

It is applicable for printing number in various metal products with the sensitive operation system.

超声波清洗机
Ultrasonic wave cleaner

适用于清洗各种喷丝板、喷丝头、喷嘴的微孔清洗工作。

It is applicable for cleaning the micro-holes in various spinnerets, spray nozzles.

金相测量显微镜
Metal lo-graphical measurement microscope

适用于各种产品的微孔测量，最高精度达0.001mm。

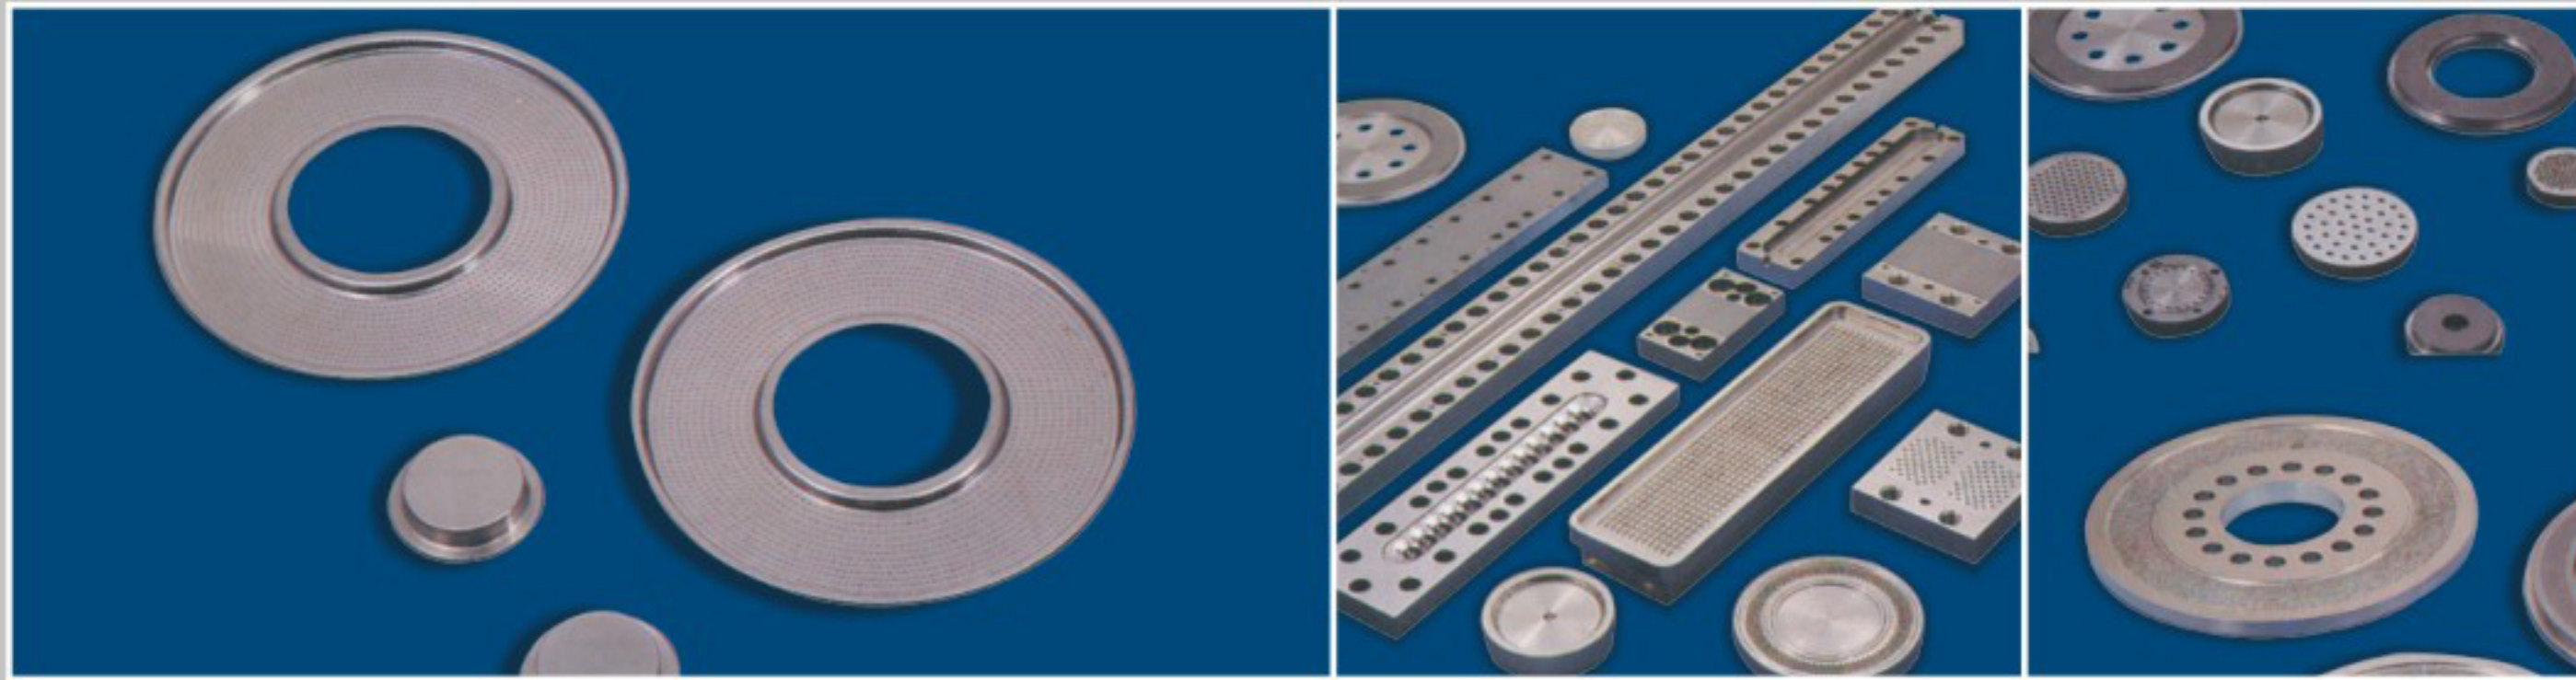

It is applicable for measuring accuracy reaches as precise as 0.001mm.

高精度研磨机
High precision grinder

适用于各种喷丝板、喷丝头的表面光洁度处理，最高精度可达到Ra0.2。

It is applicable for surface fineness treatment in various spinnerets. The maximum accuracy reaches as high as Ra. 0.2
